artprinting

COMPANY PROFILE · 2026

Print, signage and site branding, manufactured in Abu Dhabi.

Art for Printing Industry LLC SPC is an ICV-certified Abu Dhabi manufacturer that designs, produces, stores and installs the printed and fabricated identity of large projects: site signage, permanent signboards, banners, glass films, packaging and the controlled documents a site runs on.

مصنع إماراتي في أبوظبي للطباعة واللوحات وهوية المواقع والمشاريع الكبرى — من المواصفة إلى التركيب.

- **ICV** certified manufacturer
- Industrial licence · Abu Dhabi
- Design · production · storage · installation
- Arabic & English

Established in Abu Dhabi	Production sections under one roof	Machines across 19 disciplines	ICV score, certified to May 2027	UAE delivery zones, own installation crews

WHO WE ARE

A manufacturer that answers for the whole job

من نحن

We print, cut, engrave, fabricate and install from our own factory in the Al Dhafra Region of Abu Dhabi. The team that quotes a job can walk onto the floor where it is made, and the crew that installs it belongs to the same company.

Large projects rarely fail on a single sign. They fail on the hundredth repeat order that arrives in a slightly different colour, on a delivery that misses the site's access window, or on a fixing nobody owned. Our work is organised around those points.

We hold a specification steady across repeat orders: the same material, colour and size, a year later and on another site. We keep stock for our clients so a replacement is released, not re-made. Where a requirement is outside what we do well, we say so in writing before an order is placed.

One accountable supplier

Specification, artwork, production, inspection, delivery, installation and re-supply under one contract and one point of contact.

Built for repeat supply

Standing rate agreements and call-offs for the consumables a project uses every week.

Installed by our crews

Signage, hoarding graphics, window films and flag systems fitted by our own teams, including facade work at height.

Run on our own platform

Every order, file, machine and delivery sits in one purpose-built system connected to our ERP.

OUR JOURNEY

From an Abu Dhabi print house to an industrial manufacturer

مسيرتنا منذ التأسيس

We began as Art for Printing, a print establishment serving government and enterprise clients in Abu Dhabi. In 2025 the business was developed into Art for Printing Industry LLC SPC, an industrially licensed factory built to meet local and international standards.

2013

Art for Printing is established

A print establishment in Abu Dhabi, licensed by the Department of Economic Development, supplying stationery, signage, flags and official print to government and enterprise.

2024–25

The order book moves to an ERP

Sales, production, stock and delivery are recorded in one ERP, which gives every figure below its source.

2025

Art for Printing Industry LLC SPC

The business becomes an industrial manufacturer with an industrial licence, six production sections under one roof and its own installation crews.

2026

ICV certification and a digital factory

ICV-certified manufacturing, a purpose-built platform running the website, the floor and the ERP, and published policies with live responsibility metrics.

2027

Certified, connected, ready to scale

ISO 9001 certification, UAE e-invoicing, staged capacity growth and the commitments set out in our roadmap below.

OUR RECORD ACROSS BOTH COMPANIES · سجلنا في الشركتين

735,000+
Pieces printed and manufactured

4,700+ m²
Of large-format print

5,460+
Order items produced

444
Distinct products made

3,470+
Confirmed orders

1,480+
Customers served

Confirmed orders of Art for Printing and Art for Printing Industry LLC SPC recorded in our ERP from February 2025 to October 2026. Work delivered between 2013 and 2024 predates the ERP and is not counted.

WHAT WE DELIVER

Product lines for projects and operations

خطوط المنتجات

Each line is supplied to the project's drawings and specification, in Arabic and English where the content calls for it, and installed where installation is part of the scope. The live catalogue is at artforprinting.ae/en/products.

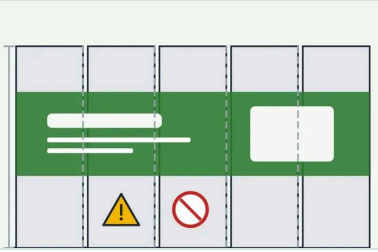

Site & project signage

لوحات المواقع والمشاريع

The regulated set a construction, infrastructure or energy site must display, and the signs that run it day to day.

- Site OSH notice boards
  `ADOSH-SF CoP 53.1`
- Project QR code entrance boards
  `DMT, Oct 2024`
- Safety signs in Arabic and English
  `CoP 17.0 · ISO 7010`
- Assembly-point, PPE and emergency signs on reflective sheeting
- Work-zone traffic signs and barricades; permanent road signs on prismatic sheeting
- Oil & gas: pipeline route markers, H2S warning, muster points, pipe labels, valve and equipment tags
- Photoluminescent exit and fire-equipment signs
- HSE notice boards with document holders
- Dubai project information and safety instructions signs
  `DM 11-1-1`

Site signage guide →

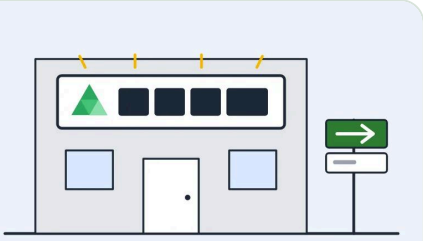

Hoarding, mesh & banners

الأسوار والبانرات

Large-format graphics for site perimeters, scaffolds, facades, launches and events.

- Site hoarding graphics and project branding
- Scaffold and facade mesh, specified by open area and fixing
- Building wraps and oversized welded PVC banners
- Frontlit and blockout PVC banners with eyelets or pole pockets
- Safety-slogan strips and project-name banners for site fences
- Roll-up and pop-up displays; exhibition backdrops and booth panels
- Vertical, facade and feather flags; national and satin flags; pole and base systems
- Printed crowd-control barrier sleeves

Banner guide →

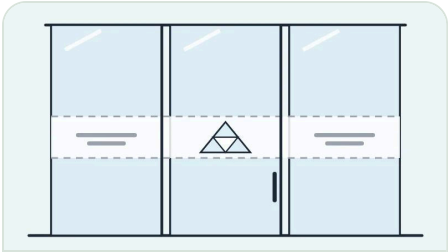

Permanent signage & fabrication

اللوحات الدائمة والتصنيع

Building, facility and wayfinding signage made to last outdoors in the UAE climate.

- 2D and 3D signboards, fascia and building identity
- Fabricated stainless steel letters, back-lit and illuminated
- ACP aluminium composite panels and powder-coated aluminium
- Acrylic, LED and illuminated displays
- Door, room and wayfinding signs
- Aluminium asset identification plates and engraved tags
- CNC routing, laser cutting and engraving to drawing

Signage in Abu Dhabi →

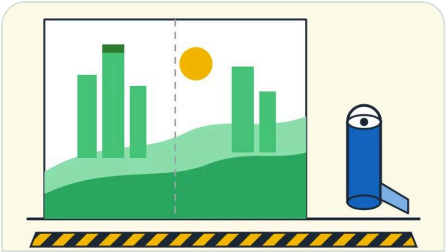

Frosted glass & window films

الزجاج المصنفر وأفلام النوافذ

Privacy, branding and safety marking on offices, partitions and shopfronts, measured on site.

- Standard-cut and reverse-cut frosted logos and lettering
- Full-coverage privacy film
- Banded manifestation on full-height glazing and glass doors
- Printed frosted film for patterns and gradients
- One Way Vision for shopfronts and vehicles
- Removable films that lift cleanly at the end of a lease

Frosted film guide →

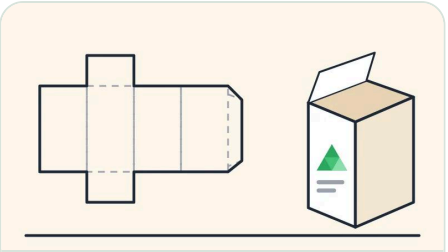

PVC, vinyl & interior graphics

الفينيل والجرافيكس الداخلية

Applied graphics for fit-outs, branch roll-outs, fleets, equipment and controlled marking.

- PVC and vinyl stickers by the square metre, any size
- Contour-cut decals, labels and equipment markings
- Vehicle and fleet wrapping in print film
- Floor marking and safety graphics
- Made-to-measure printed wallpaper and wall graphics
- Office branding: entrance walls, meeting rooms, reception

Stickers and vinyl →

Packaging التغليف

Structural and branded packaging, from a single sample to production runs.

- Custom boxes in ten structural styles, with dieline and 3D mockup before print
- Rigid and corporate packaging; presentation boxes
- Kraft, white card, coated, black board, food board and greyboard
- Foil stamping, spot UV, emboss, deboss and window cuts
- Paper bags, labels, tags and wrapping paper
- Corrugated waste-segregation bins printed by waste stream

Packaging configurator →

Official print & controlled documents

المطبوعات الرسمية والنماذج

The documents an organisation consumes continuously, and the ones it issues officially.

- NCR control books: diesel issue, store vouchers, plant orders, permits
- Certificates printed, foiled, embossed and framed, with security and anti-copy features
- 2D and 3D holographic foiling
- Letterheads, business cards, envelopes and official stamps
- Official leadership portraits, framed prints and canvas
- Name badges and staff identification

Artwork size guide →

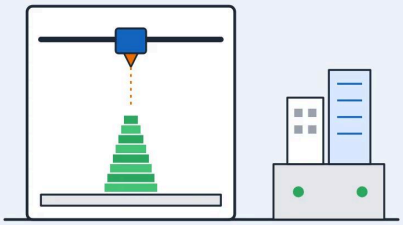

VIP leather & corporate gifts

الهدايا الجلدية الفاخرة

Handcrafted genuine-leather pieces for protocol, ceremonies and executive offices, made to order in Abu Dhabi.

- Certificate, agreement and signature folders
- Desk, coffee and serving accessories; tissue boxes
- Device sleeves and executive organisers
- Presentation and gift boxes
- Personalisation by embossing, foil and engraving
- Awards, trophies, shields and mementos

See our work →

Custom orders & 3D printing

الطلبات الخاصة والطباعة ثلاثية الأبعاد

When a requirement has no catalogue item, we engineer it with you from the drawing or the idea.

- 3D-printed models, prototypes and display pieces
- Scale models for projects, launches and exhibitions
- Custom components, fixtures and holders to drawing
- Special finishes, materials and sizes outside the standard range
- Exhibition stands, kiosks and branded environments
- Sampling and a signed-off prototype before production

Discuss a custom order →

SITE SIGNAGE, BY EMIRATE

We start from the code the site answers to

ما تفرضه الأنظمة على المواقع

The same item answers to a different document in each emirate. We build the signage list from the permit, the risk assessment and the operator's project specification, so the site is complete on the day of inspection.

Site OSH notice board

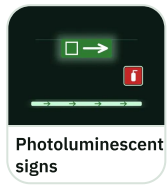

Project QR code board

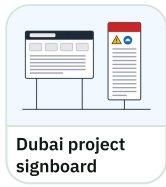

Safety signs

Site hoarding

Work-zone traffic signs

Oil & gas site signs

Photoluminescent signs

Dubai project signboard

ITEM	ABU DHABI	DUBAI
Site notice and safety instructions	Site OSH notice board ADOSH-SF CoP 53.1	Safety instructions sign at the entrance DM Circular 11-1-1
Project information	QR code board at the entrance DMT guideline, October 2024	Project information sign with licence numbers DM Circular 11-1-1
Safety signs	Colours, shapes, Arabic and English ADOSH-SF CoP 17.0	ISO 7010 symbols DM Code Ch. 6 · DM-HSD-GU99-SSW2
Hoarding	Temporary fence licence Abu Dhabi City Municipality	Perimeter hoarding DM Circular 12-4-1

Where a code is silent, the project specification governs. Item-by-item guidance, with sizes and specifications, is published at artforprinting.ae/en/site-signage.

HOW A PROJECT RUNS

From the site list to the last re-supply

مسار المشروع

Every order follows the same recorded path in our system, so the status of any item on any site can be answered on the day it is asked.

01

Brief

Site list, drawings or the procurement request, with locations and dates.

02

Specification

Code and permit check, materials for the exposure, quantities by location.

03

Artwork & approval

Bilingual artwork; the client approves a proof on a private link, recorded on the order.

04

Production

Files preflighted, jobs scheduled across our work centres against real capacity.

05

Inspection

Checked against the order, packed and labelled by site and location.

06

Delivery & installation

Our crews install, with method statement and risk assessment for the site.

07

Re-supply

Stock held for the client and released on call-off for replacements and new phases.

QUALITY ASSURANCE

Defects are stopped at the file, and recorded when they are not

ضبط الجودة

Most print defects are born before a machine runs. Our controls start there and follow the job to the site. File requirements for clients are at artforprinting.ae/en/help-center; our quality commitments at artforprinting.ae/en/responsibility/quality.

- **Automated preflight on every artwork.** Resolution, bleed, colour space, fonts and size are checked against the product before production can start.
- **Client approval before printing.** Proofs are approved on a private link and the approval is kept on the order.
- **Authored production routes.** Each product family carries its route through the work centres, with the checks, tolerances and known failure modes for that product.
- **Specification lock for repeat orders.** The approved material, colour and size are held on the record, so a re-order reproduces the original.
- **Defects logged with cause and action.** Non-conformities and complaints are recorded on the order with responsibility and corrective action.
- **Machine checks on record.** Each production machine has a digital condition and safety check sheet with photographs; faults are logged the day they are found and tracked to repair.
- **Delivery measured against the promise.** Every delivery is recorded against the date we committed to.
- **Reference standards.** ISO 12647 for print colour and PDF/X for print files. ISO 9001 certification is scheduled for Q2 2027.

SUPPLY CHAIN & CONTINUITY

Materials on hand, and your stock held for you

سلاسل الإمداد والتخزين وضمان الاستمرارية

A project schedule cannot wait for a shipment of sheeting. We manage raw materials and finished stock so supply continues through the life of a project.

Raw-material assurance

- **Qualified suppliers for every core medium:** reflective sheeting, PVC and mesh, vinyl and films, ACP and aluminium, acrylic, board and papers.
- **Safety stock of fast-moving media,** counted and replenished before it runs short.
- **A material catalogue in our ERP** with consumption units, supplier lead times and purchase history for each item.
- **Local procurement first.** The majority of our procurement spend stays with Abu Dhabi suppliers, which shortens lead times and supports in-country value.
- **Alternative approved suppliers** for each critical material, so a shortage at one source does not stop a project.

Client stock-holding and call-off

- **We store what we produce for you** in our warehouse, labelled by site, phase and location.
- **Produced in economical batches,** released on call-off as the project needs it, which lowers the unit cost of every replacement.
- **Replacements without lead time.** A damaged sign, a used-up control book or a new site phase is supplied from stock the same week.
- **No storage burden on site.** Your teams do not hold, count or protect printed stock.
- **Standing rate agreements.** The specification and rate are fixed once, and repeat requirements are released against them without re-tendering.

Continuity programme · برنامج الاستمرارية

One specification, held in stock, released across every site and phase.

For multi-site operators and main contractors we combine a fixed specification, a standing rate, held stock and scheduled replenishment of consumables such as control books, safety signs, flags and labels. Your buyers place call-offs instead of new orders, and every site receives the same item.

OUR DIGITAL FACTORY

A factory run on a system we built for it

منصتنا الرقمية لإدارة المصنع

Our website, production floor and ERP run on one platform designed specifically for print and fabrication. It prices by specification, schedules against real capacity and keeps one record of every order from enquiry to delivery.

Specification pricing

Banners, signs, stickers, boxes and wallpaper are priced from their dimensions, material and run length the moment they are specified, on the website, by API and by AI agents alike.

One record, order to delivery

Website, portal, partner and agent orders enter one ERP-synchronised flow covering sales, production, stock, delivery and HR.

Production control

Work-centre routes, capacity-based scheduling, job costing by work centre, a materials catalogue and a machine register mapped to the floor.

Design and workshop boards

Every job is visible by stage, by designer and by due date, with artwork files and approvals attached to the order itself.

Quality and compliance records

Preflight results, approvals, defect logs, machine checks and a credentials register with expiry alerts, all in the same system.

Customer communication

WhatsApp and email in one inbox, response times monitored, and an end-of-day review of every conversation still awaiting a reply.

Tenders and contracts

One hub for prequalifications, tenders and framework contracts, with renewal tracking and contract-review support.

People and attendance

Attendance with face verification, linked to staff records and the ERP, with training and welfare registers.

Open to partner systems

A signed partner API and a published Universal Commerce Protocol profile let client systems and AI agents price, order and track directly.

The platform measures its own readiness for agent commerce, ERP integration, manufacturing intelligence and UAE e-invoicing, and publishes the results live; see Standards & readiness below.

Artificial intelligence · الذكاء الاصطناعي

AI reads, summarises and flags. People decide.

We use AI to triage email into tasks, review customer conversations for unanswered requests, review contract terms, translate, and draft product information. Approvals, prices and commitments are made by people, every AI step is logged, and prices are always calculated by our own rules on our own servers.

STANDARDS & READINESS

Measured by the platform itself, not declared

الجاهزية المقاسة

Our platform scores its own readiness against published standards and re-measures as each check runs. These are the figures at the time of this edition, and what each one means for a client. The live figures and every item behind them are at artforprinting.ae/en/partners.

91%

Measured 18 Sep 2026

Agent commerce readiness

Universal Commerce Protocol 2026-08-25

Your procurement system or AI assistant can find our products, price a specification, prepare an order and track it to delivery, with your buyer confirming every order.

88%

In-Country Value

UAE National ICV Programme

Spend with us counts toward your own ICV commitments in government and energy-sector contracts.

DATA PROTECTION & SOVEREIGNTY

Your files and data, kept to the job they were sent for

حماية البيانات والسيادة الرقمية

Clients send us drawings, artwork, site lists and sometimes sensitive material. Access is governed by design, in line with the direction of UAE government data policy. See our privacy policy and governance commitments.

- **Private by default.** Client artwork and documents are kept in private storage and opened only through signed, time-limited links.
- **Used only for the order.** Files are used to produce the job they accompany and are never published without permission. Design rights stay with the client.
- **Role-based access.** Staff see only the sections and fields their role requires; credential documents are view-only and every view is logged.
- **Personal data rights.** A published privacy policy, with a process to request or delete the data we hold, referenced to the UAE Personal Data Protection Law.

Sovereign-ready architecture

The platform is built on portable, open components (PostgreSQL and Node.js), with external services connected through one configurable integration layer. A migration path to UAE sovereign cloud infrastructure, such as Core42, has been assessed, so the system, its data and its AI processing can be hosted in-country where a client or authority requires it.

Reference frameworks: UAE Personal Data Protection Law; ISO 27001 as a reference for information-security practice. References are not claims of certification.

MADE IN THE UAE

An in-country manufacturer, ready for national programmes

صُنع في الإمارات · أبوظبي

We manufacture in Abu Dhabi, buy locally first, and keep our catalogue and documentation ready for government procurement and export. Every certificate below can be viewed in our credentials register.

ICV-CRT-01

In-Country Value certificate

UAE National ICV Programme, Ministry of Industry & Advanced Technology. Score 51.17%, valid to 31 May 2027.

IND-LIC-01

Industrial licence

Abu Dhabi Department of Economic Development, valid to May 2027.

EST-LIC-01

Commercial licence

Abu Dhabi Department of Economic Development, established 2013.

CD-CRT-01

Civil Defence certificate

Abu Dhabi Civil Defence, valid to June 2027.

SME-MEM-01

National Programme for SMEs

Ministry of Economy membership, valid to December 2027.

ADC-MEM-01

Abu Dhabi Chamber

Abu Dhabi Chamber of Commerce and Industry membership.

Make it in the Emirates, and Abu Dhabi's industrial direction

Our production, procurement and hiring are in the UAE, aligned with Make it in the Emirates and the national industrial strategy. We work through the supplier programmes of energy, government and semi-government buyers, and we treat Abu Dhabi as both our production base and our export base, with sea and air-cargo links to the GCC, the Middle East, Africa and South Asia.

Government digital catalogues and export documentation

Our catalogue is held as structured data: bilingual names and specifications, units of measure, images and Harmonized System codes, ready for government digital catalogues and e-procurement platforms and for export paperwork. We are registered or registering on the procurement portals our clients use, and we are preparing for UAE e-invoicing (PINT AE).

- `4911.10` printed matter
- `3919.10` self-adhesive film
- `3921.90` PVC sheet & banner
- `4820.10` registers & control books

GOVERNANCE, ETHICS & ESG

Written rules for how we do business

الحوكمة والنزاهة والاستدامة

The positions procurement and compliance teams ask for in prequalification, with the document behind each one.

TOPIC	OUR POSITION	EVIDENCE
Code of Conduct	A written Code of Conduct, and an Employee Policies & Procedures Manual signed by staff, define how everyone in the company works.	GOV-POL-01 · signed manual acknowledgements
Fraud	Zero tolerance. Approvals, purchasing and invoicing run through the ERP with defined roles, and the company is audited annually.	ERP role controls · annual audit
Anti-bribery	No payment, gift or hospitality may be offered or accepted to influence a business decision.	Code of Conduct GOV-POL-01; all-staff signature by Q1 2027 · UN Global Compact principle 10 (reference)
Conflict of interest	Staff declare any personal interest in a supplier, client or tender, and step back from that decision.	Company policy · declaration on request
ESG	Water-based and low-emission inks, computer-nested cutting, print-to-quantity production, fair employment and welfare, and live published metrics.	CSR-POL-01 · HR-POL-01 · published commitments
Sanctions	We do not trade with persons, entities or destinations under UAE or United Nations sanctions.	Signed declaration on request
Company convictions	Declared on the buyer's prequalification form.	Signed declaration on request
Executive convictions	Declared on the buyer's prequalification form for each director and executive.	Signed declaration on request
Public officials	Relationships with public officials are declared; no benefit is offered to any official.	Signed declaration on request

Health & safety

Civil Defence certificate, an Occupational Health & Safety Policy (HSE-POL-01), digital machine check sheets, an incident log and PPE issue register, free PPE, and authorisation before anyone operates a machine.

Environment

Wide-format work on water-based HP Latex inks certified UL ECOLOGO and UL GREENGUARD Gold; LED-UV curing; nested cutting that reduces scrap.

People & community

An Employee Welfare Policy (HR-POL-01), a confidential grievance channel, training recorded in hours, and a commitment to Emiratisation.

Certification roadmap: ISO 9001 (Q2 2027), ISO 45001 gap assessment (Q2 2027), FSC chain of custody (2027). Our full roadmap and live figures are published at artforprinting.ae/en/responsibility.

PLAN TO 2027

What we have committed to next

خطتنا حتى 2027

Our improvement roadmap is published and updated as items close, including the ones not done yet. The live version is at artforprinting.ae/en/responsibility/roadmap.

DONE IN 2026

- Employee Welfare Policy signed and published
- Confidential grievance channel opened
- Training recorded in hours per employee
- Written OSH policy and summer heat-stress programme
- Incident log and PPE issue register
- Social Contribution & Sustainability Policy signed and published

Q2 2027

- ISO 9001 certification
- ISO 45001 gap assessment
- ICV certificate renewal

DURING 2027

- UAE e-invoicing (PINT AE) through an accredited service provider
- FSC chain-of-custody certification
- Business continuity plan
- External sustainability rating
- First UAE national training placement or hire
- Staged expansion of production capacity, each step matched to demand
- In-country hosting of our platform for clients and authorities that require it

Q4 2026

- Every open machine fault closed with cause and action
- Recycling partner with certified collection weights
- On-time delivery published, measured against the promise

Q1 2027

- Code of Conduct including anti-bribery, signed by all staff
- Share of spend with UAE-based suppliers measured
- First annual Welfare & Community Report

WHO WE WORK FOR

Sectors we supply

القطاعات التي نخدمها

We supply organisations whose sites, standards and procurement processes demand a manufacturer rather than a print shop.

Government & municipal

الجهات الحكومية والبلديات

Permanent signboards, official printed material, protocol items and display systems.

Oil, gas & energy

النفط والغاز والطاقة

Pipeline and plant marking, field safety signage and control books, to operator specifications.

Construction & contracting

المقاولات والإنشاءات

Site signage sets, hoarding graphics, safety banners and continuous site consumables.

Real estate & developers

التطوير العقاري

Project branding, show-unit and sales-centre graphics, building identity and wayfinding.

Military & defence

القطاع العسكري والدفاع

Identification plates, signage, flags, official print and protocol pieces, produced under the client's confidentiality requirements.

Aviation

الطيران

Identification, onboard and presentation materials on continuing supply.

Industrial & EPC

الصناعة والمقاولات الهندسية

Notice boards, ACP panels, asset plates and safety marking for operating plants.

Health & education

الصحة والتعليم

Wayfinding, glass manifestation, low-emission interior graphics and printed supplies.

Hospitality & events

الضيافة والفعاليات

Banners, flags, exhibition displays, packaging and presentation pieces.

CLIENTS & PARTNERS

Organisations we have supplied

عملاؤنا وشركاؤنا

A selection of the government entities, national companies and project contractors we supply.

Logos are the trademarks of their owners and are shown only to identify organisations we have supplied.
